Obituary.

Wilma, the youngest daughter of Mr. and Mrs. F. A. Baston, was born August 30, 1901, and died at their home four miles north of Jasper, Sunday morning, May 5, 1912. At the time of her death, she was 10 years, 6 months and 5 days old. She was laid to rest in the Waters Cemetery.

Wilma had been ill for 13 weeks. First, she was very low with pneumonia; and later abscesses formed on her side which led to an operation. All that loving hands could do to lessen the suffering of this little one was done by neighbors and relatives, especially her sister who is at home.

She was a very patient, kind-hearted, and obedient child, loved by her friends and schoolmates. She leaves father, mother, three brothers, three sisters, and many friends to mourn her departure.

We extend our heart felt sympathy to the bereaved relatives and friends.

Jesus called for little Wilma To join Him in that home on high, Where the loved ones left may meet her, And there'll be no more good-byes.

Jesus called and Wilma answered That silent call sent from above; And she is now with the angels Around the heavenly throne of love.

Waiting there in heaven to meet us With other loved ones gone before, Where our sorrows will be over And good-byes be said no more.

A FRIEND.

No Matter What You Are Planning to Build, You can Use 20% less of ASH GROVE SUPERFINE Portland Cement Than You can of "Standard Ground" cement—and GET BETTER RESULTS!

Why? It is ground 10% finer than any Standard ground cement. The finer a cement is ground, the stronger it is. For the cementing value, the binding power, depends upon the fineness to which the particles are ground. That's the reason for the great strength of

Ash Grove Superfine Portland Cement

Uncle Sam's engineers set a standard for fineness below which no cement may go without being penalized. But they also decreed that you can use 3% less of a cement for every 1% increase of fineness over Standard ground. Since Ash Grove Superfine is 10% finer than Standard you could use 30% less of it under ideal conditions. Such conditions do not always exist so it is guaranteed that 20% less can be used. Get all the facts before you buy—talk with us or write to the Ash Grove Lime & Portland Cement Co., Kansas City, Mo., for complete information.

We recommend and sell ALL GROVE SUPERFINE.
